

## How to set up alarm email notifications on the WBOX Hybrid DVR?

This article outlines the step-by-step guide on how to setup alarm email notification on the Hybrid DVR. This set up can also be used when you forgot the password of the Hybrid DVR.

Product Models: **WBXHD041S1T, WBXHD041S, WBXHD082S2T, WBXHD082S, WBXHD162S4T and WBXHD162S.**

### Preparation:

1. Ensure that the device is connected to a network and the status is '**Online**'. You can find this information under **System Settings > Network > P2P > Enable**.
  - First make sure the device is connected to a router with Internet access.
  - Change the network settings on the device interface.
    - The gateway should be the router's local IP.
    - The device IP should stay in the same IP range of the router (gateway).
    - Subnet mask should be 255.255.255.0.
    - DNS server should be the same as the router or can be 8.8.8.8 and 8.8.4.4.

2. Make sure that the alarm settings are properly set up and **E-mail Push** option should be enabled. Alarm can be for motion detection, video loss or camera tamper.

➤ **Motion detection**

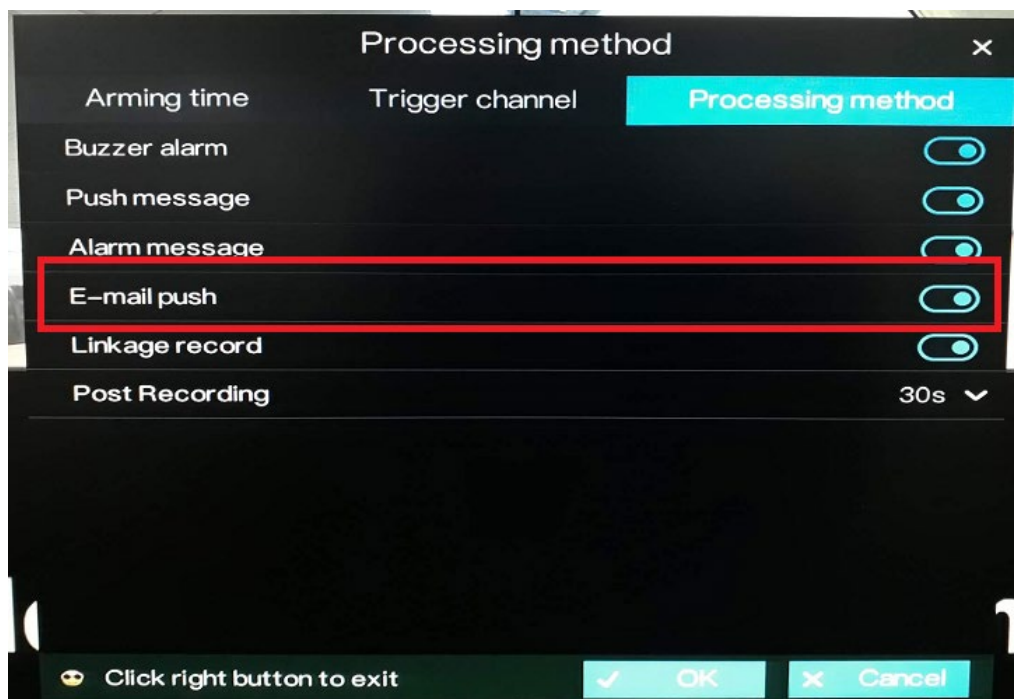

Camera > Menu > Motion detection > Processing Method > Processing Method > E-mail Push

➤ **Video Loss**

Camera > Menu > Video Loss > Processing Method > Processing Method > E-mail Push

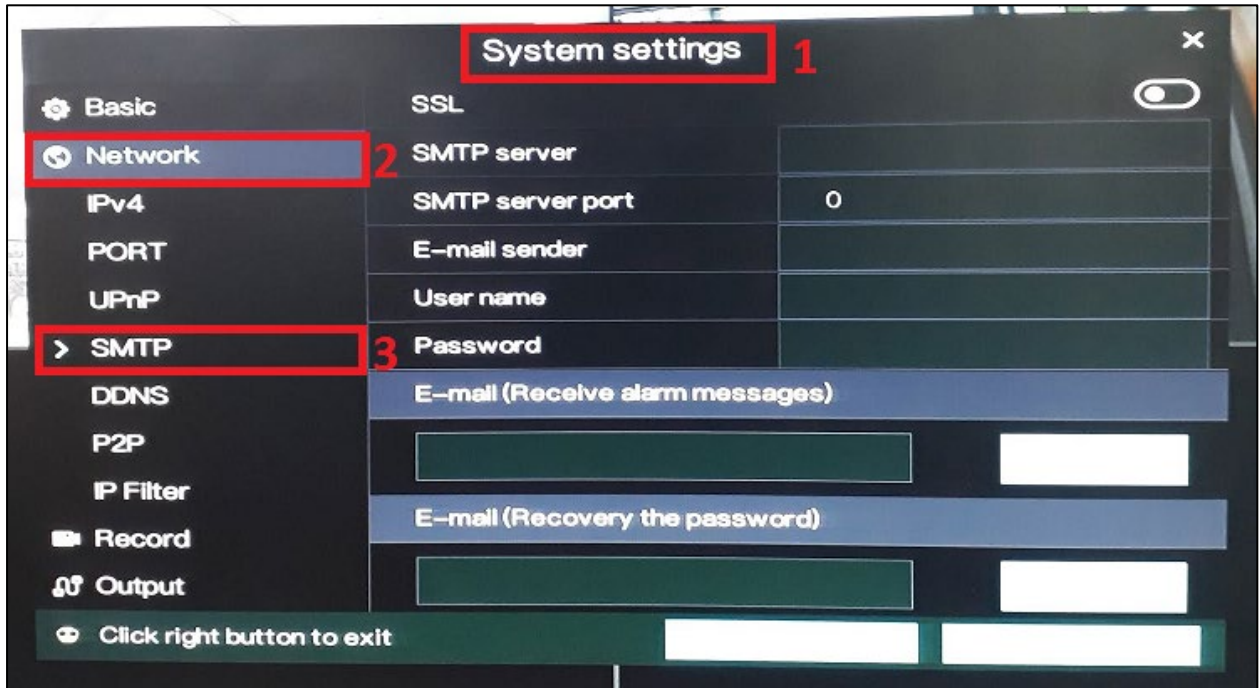

➤ **Camera tamper**

Camera > Menu > Camera tamper > Processing Method > Processing Method > E-mail Push

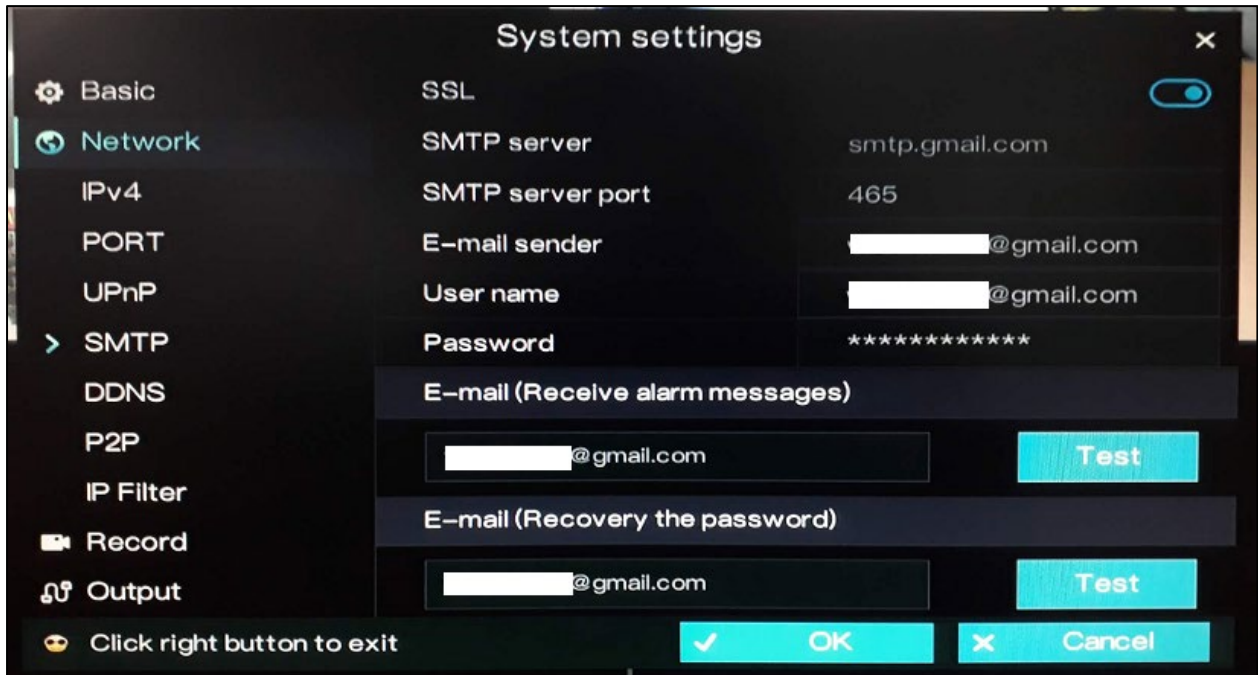

**Procedures:**

1. Go to **System Settings > Network > SMTP**.

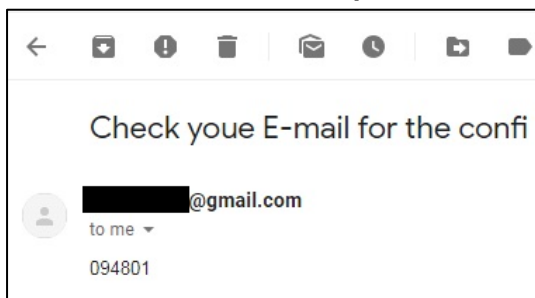

2. Input the correct SMTP settings of your email account.
  - **SSL** – Email encryption
  - **SMTP server** – SMTP server address
  - **SMTP server port** – Port number of the SMTP server
  - **User name** – Username of the mailbox for sending alarm messages
  - **Password** – Password of the mailbox for sending alarm messages
  - **E-mail (Receive alarm messages)** – Recipient of the alarm messages
  - **E-mail (Recovery the password)** – Recipient of the password recovery message

3. Click on **Test** beside the email recipient to test if the recipient will receive the messages.

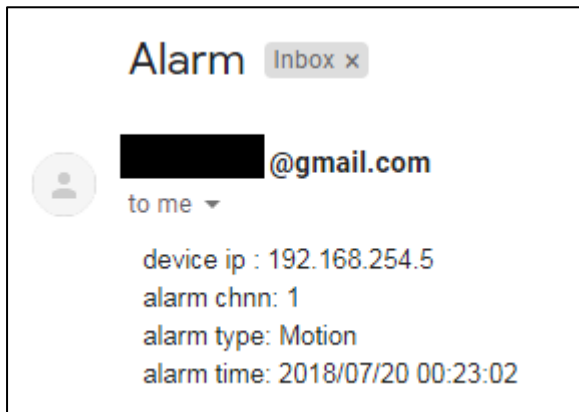

**Received test email sample:**

4. If test email was received successfully, click **OK** to save the settings.

**Received alarm email notification sample:**
