

EZBracket®

UNIVERSAL PRE-CONSTRUCTION SPEAKER BRACKET

EZBracket patented universal speaker bracket works with virtually all in-ceiling speakers. Allowing installers to have one speaker bracket on the job site making them ready even for a change order on prewire day.

EZ to install with rigid moisture proof corrugated board with the ruler pre-printed on the bracket which makes for a quick install. The ruler allows you to keep your future speakers square with one another. The addition of center line marks on the bracket makes it simple to align with can lights. Once the bracket is in place it is simply stapled to the floor joist with a staple gun.

The EZBracket adjustable metal ring gives a sturdy guide for the drywall installer to cut a hole with a RotoZip® tool.

- E ZIC UNIVERSAL TEMPLATE WORKS WITH VIRTUALLY ALL ROUND SPEAKER
- CORRUGATED FRAME ATTACHES DIRECTLY TO CEILING JOISTS WITH A STAPLE GUN FOR EASY INSTALLATION
- PRE-PRINTED RULER ON ALL SIDES ENSURES PERFECT ALIGNMENT FOR EACH BRACKET AND INSTALLED LIGHT CANS
- METAL RING GIVES A STURDY GUIDE AND PREVENTS CUT-THROUGH WITH A ROTOZIP TOOL
